SONTOWER

LOADING & UNLOADING OF PRODUCTION PLANTS

In the SONTOWER loading and unloading magazine, raw parts and production parts are prepared in containers for further processing. The containers are then separated, transported to the unloading position, and fed into the further process by a robot.

FUNCTION

- ✓ Provision of the parts
- ✓ Transport to loading/unloading position
- ✓ Feeding into further process
- ✓ Safe and gentle storage
- ✓ Packed directly in containers

Operation

Keys and touch panel

Products

Dependent on containersbis
up to 800x800x300mm

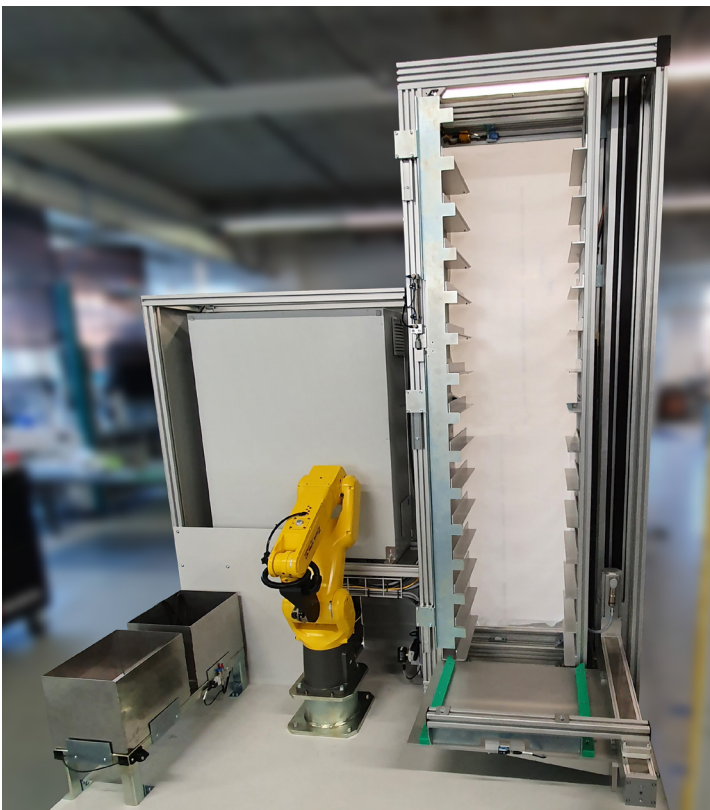

Capacity

Maximum capacity
up to 40 blisters

Benefits

Autonomous operation of
the production equipment
